Mr. Timothy Rehder
Rocky Flats Team Lead
U.S. Environmental Protection Agency, Region VIII
999 18th Street, Suite 500, EPR-FT
Denver, Colorado 80202-2450

Dear Mr. Rehder:

The U.S. Department of Energy Rocky Flats Field Office received your correspondence dated August 9, 2001, regarding your agency comments on the "RFCA Standard Operating Protocol (RSOP) for Asphalt and Soil Management." Your comments are similar to other comments received during the formal public comment period that ended on July 2, 2001. These comments have been addressed in the revised RSOP as described below.

In bullet number 1 of your comment, two changes have been incorporated into the Asphalt and Soil Management RSOP, which provides the necessary detail for staging piles, including timeframes, protective measures, contaminant concentrations, staging pile designation and approval. Section 2.4, page 10 has been rewritten, and the definition for "staging pile" provided in the Definitions Section of the RSOP has been clarified.

In bullet number 2, Section 2.3 of the RSOP was revised to clarify this point i.e., "with similar concentrations of the same type of constituents, containing similar chemical and/or isotopic profile."

Lastly, in bullet number 3, the Rocky Flats Cleanup Agreement (RFCA) parties agree that the movement and characteristics of soil and asphalt subject to this RSOP require "tracking." As described in Section 7.1 of the RSOP, an appropriate Site database, as well as the Historical Release Report Annual Updates will be utilized to document and track asphalt/soil characterization, and relocation.

If you should have any technical questions related to this RSOP, please contact Norma I. Castaneda, of my staff, at (303) 966-4226 or you may contact me at (303) 966-5918.

Sincerely,

Joseph A. Legare
Assistant Manager
for Environment and Stewardship
